

Poison Prevention Tips

Making your home safe is critical to avoiding accidental poisoning. Ninety percent of poisonings occur in the home. Here are some basic tips for preventing poisonings:

- Never mix household or chemical products together. This can create a dangerous gas.
- Never share prescription drugs.
- Store all chemicals, household cleaners, medicines, and other potential poisons in a safe place away from children.
- Call poison control at 1-800-222-1222 for poison emergencies
